

SANDEEP RAI

FULL-STACK FRONTEND ENGINEER | REACT.JS • NEXT.JS • AI-ASSISTED ENGINEERING

New Delhi, India | +91 8851413233 | raisandeep756@gmail.com | linkedin.com/in/sandeeprai7531 | github.com/sandeep-75

PROFESSIONAL SUMMARY

Senior Frontend/Full-Stack Engineer with 6.5+ years shipping production React.js and Next.js applications, Node.js/Express services, and React Native mobile experiences across fintech, proptech, and marketplace products. Proven track record taking ownership of complex, production third-party integrations end-to-end (payments, banking data, identity/auth) rather than following quickstart guides, with strong security awareness around auth scoping, credential handling, and input validation. Comfortable working inside existing, multi-team codebases to extend and clean up frontend architecture, component libraries, and state management without breaking live functionality. Hands-on daily user of Claude and generative AI tooling to accelerate delivery, alongside solid experience with automated testing, CI/CD, and cross-functional delivery with product owners and designers.

CORE SKILLS

Full-Stack Languages & Frameworks: JavaScript, TypeScript, Python, React.js, Next.js, React Native, Node.js, Express, HTML, CSS

Data & Backend: MongoDB, MySQL, WebSocket, Firebase, REST API Integration & Design

Third-Party & Cloud Integrations: Razorpay (payments), Plaid (banking/identity data), AWS Cognito/CAPTCHA (auth & fraud prevention), AWS S3/EC2/Route53/Amplify

Architecture & UI Systems: Micro-Frontends, NX Monorepo, Reusable Design Systems, Tailwind CSS, shadcn/ui, Radix UI, Material UI, Ant Design, Accessibility Standards

Modern Tooling: Vite, Turborepo, TanStack Query, Zustand, GraphQL, tRPC, SSR, State & Data Management, Web Performance Optimization

Testing & Quality: Jest, React Testing Library, Playwright, Cypress, Storybook, Frontend Security

AI & Automation: Claude, ChatGPT, Groq, n8n, Agentic AI Development, Generative AI Workflows, AI Automation Pipelines

Process & Delivery: Git, GitHub, CI/CD Pipelines, Agile Development, Production Incident Response

PROFESSIONAL EXPERIENCE

Software Engineer — Narith AI (The LCF Group)

Nov 2024 – Jan 2026

U.S.-based fintech delivering funding solutions to businesses nationwide

- Owned two embeddable SDKs end-to-end in an NX monorepo using micro-frontend architecture, letting partners integrate without redeploying the core platform — the kind of decoupled, extensible module structure that keeps a shared codebase easy to build on.
- Built and owned a Razorpay payment gateway integration end-to-end — REST API integration, error handling, and failure-mode handling for secure merchant payment processing across multiple partner applications.
- Built and owned a Plaid integration for secure bank account linking and financial data verification, including resilient error handling so partner applications degrade safely when the third-party service is flaky.
- Architected the LCF ISO web portal end-to-end (React.js, TypeScript, AWS Cognito/S3/EC2), automating loan processing for Independent Sales Organizations.
- Strengthened frontend security by integrating AWS Cognito authentication and CAPTCHA verification — correct auth scoping, safe handling of user data, and fraud prevention on login and applications.
- Established a reusable React.js component library from Figma designs, standardizing the design system so multiple teams could build on a consistent, maintainable UI foundation.
- Implemented WebSocket-based real-time features and optimized state and data management, cutting load times by 40%.
- Partnered with product owners and designers in an agile workflow to ship accessible, user-focused features 25% faster.

Frontend Developer — Aurum PropTech (WiseX)

Oct 2023 – Oct 2024

India's premier neo-realty investment platform by Aurum PropTech

- Architected aurumwisex.com from inception (React, Material UI, Redux Saga), applying scalable frontend architecture that drove a 40% increase in user engagement.
- Engineered scalable, high-performance web applications with responsive layouts, delivering a 30% improvement in application speed.

- Translated product requirements into accessible, user-focused designs alongside product owners and designers, boosting delivery speed by 25%.

Senior React Developer — Method and Madness Technology Pvt. Ltd.

Oct 2022 – Oct 2023

Built Blox.xyz, a home-buying platform spanning web and mobile

- Led end-to-end development and testing for Blox.xyz (v2.0 & v3.0) across web and React Native mobile — genuinely full-stack ownership of a single product across both platforms — achieving a 50% reduction in loading times and a 30% increase in user retention.
- Designed complex React.js applications and reusable components, improving frontend maintainability by 35% and cutting bug reports by 30%.
- Integrated analytics tooling (Google Analytics, Tag Manager, Hotjar), improving data accuracy by 25% and supporting performance optimization.

Frontend Developer — Octfy Technologies

Feb 2020 – Oct 2022

Service-based technology startup delivering client web and mobile products

- Designed, developed, and tested responsive interfaces across multiple client web and mobile applications, translating wireframes into polished, accessible, on-brand experiences.
- Delivered custom projects including TM Profile Tree (digital business cards, +25% sign-ups, -20% bounce rate), Recrugenie (e-commerce marketplace, +15% transactions, -40% load time), and government access-control portals for NIC.

SELECTED PROJECTS

TM Profile Tree

- Drove development of a React application (Material UI, Redux Saga), increasing sign-ups by 25% and reducing bounce rate by 20%.

Recrugenie

- Led development of a React/Next.js application (TypeScript, AWS Amplify/S3), increasing transaction volume by 15% and reducing load times by 40%.

NIC Government Access Portals

- Built two portals from scratch (React, Material UI) enabling cross-department access to IBM APIs procured by NIC.

EDUCATION

Master of Computer Applications — Chandigarh University

2022 – 2024

Bachelor of Computer Applications — Maharshi Dayanand University

2016 – 2019

CERTIFICATIONS & LANGUAGES

Certifications: Front-End Development Libraries & Responsive Web Design (freeCodeCamp); Web Designing (CYBEROISM)

Languages: Hindi (Native/Bilingual), English (Full Professional Proficiency)
